

PRODUCT DATA SHEET

Clear Coat Compound / VG-303

VOC compliant

Features: Body shop safe medium to light cutting compound designed for today's clearcoats, without harsh abrasives or crystalline silica.

Benefits: Removes imperfections without scouring or deep swirls high lubricity for "workability" and even cutting.

Uses: Removes up to 1000, 1200, 1500 and 2000 grit sanding marks, blemishes, acid rain etch, scratches on fresh or aged paints.

Directions: Use with high speed buffer at or below 1500 RPM with blended clear coat pad VG-03-Y use slow overlapping passes. Follow-up by polishing with Machine Polish VG-301 and a lambs wool pad VG-810G.

Tips: Lower RPM's will reduce heat allowing product to remove imperfections, higher temperatures allow scratches to be driven deeper into clear coat.

Sizes: VG-303 = 6 pints per case
VG-303G = 4 gallons per case
