

PRODUCT DATA SHEET

Fast Finish / VG-135

VOC compliant

Features: *Fast Finish* is a true “multifunction” instant detailer product. Cleans light soil, dust, and finger prints. Shines and protects all painted and non-porous surfaces.

Benefits: May be applied directly to a **dry or wet** vehicle. Cleans the surfaces and leaves a lustrous polymer protective shine. **Will not stain trim!**

Uses: May be used on all painted surfaces, cars, trucks, RV's, boats, chrome, cabinets, tool boxes, counter tops, virtually any surface. Great for show room vehicles, spot deliveries, and quick clean up of service customer's vehicles and as a maintenance product for all vehicles' paint.

Directions:

1. **Shake product well before each use.** Following normal washing of a vehicle, following final rinse, spray directly on the wet vehicle, one section at a time and towel dry, leaving a protective polymer protective finish.
2. Clean and protect dusty or slightly soiled vehicles by wetting a soft cloth with water, spray **Fast Finish** on the surface, wipe **Fast Finish** over surface with damp towel. Using second, dry, soft cloth, wipe surface to a high shine.
3. Hard surfaces, such as counter tops, cabinets, tool boxes. Spray **Fast Finish** on to surface, wipe surface with a clean, soft, dry towel to produce a high gloss, protective surface.

Tips: Use two, soft clean towels, turn the towels frequently when wiping **Fast Finish** from surface. Check our web site for using this as a buffing product.

Sizes: VG-135 = 12/22 oz. bottles per case (with sprayer)
VG-135G = 4 gallons 4 per case
