

PRODUCT DATA SHEET

Paint Sealant / VG-102

VOC compliant

Automobile Manufacturer Engineering Approved.

Features: An aminofunctional polymer – copolymer resin with an ultra violet ray blocker and anti-corrosive agent. Over eight million vehicles treated.

Benefits: *ValuGard Paint Sealant* provides a durable high gloss shine that sheets or “plates” moisture from the painted surfaces of the vehicle to help prevent environmental damage. Reduces the surface tension of the paint to lessen the bond of dirt and pollution. Protects against fading, oxidation and loss of gloss.

Uses: Painted surfaces on motorized vehicles.

Directions: See product container or separate installation instruction sheet for further details. Installation is simple and fast. One bottle treats one car.

Tips: For best results pre-clean vehicle using the ValuGard A-B-C Neutralization System. This will ensure an uncontaminated paint surface for sealant application. For easy application we recommend the use of the VG-115 Dual Action Polisher. Always allow product to dry on vehicle for at least 15 minutes.

Sizes: VG-102 = 12/3.5oz. bottles per case
VG-102P = 5 gallon pail
