

PRODUCT DATA SHEET

Premium Dressing / E-108

VOC compliant

Features: *Premium Dressing* is a water based polymer coating for tires, vinyl and other rubber vehicle components.

Benefits: Provides a rich natural luster to tires and other components. *Will not stain* painted surfaces or “sling” if properly applied. A detergent resistant multi-purpose dressing for those that prefer a natural appearance.

Uses: Tires, vinyl, interior trim, all rubber surfaces.

Directions: Spray or pour on to a sponge or soft cloth and apply to component to be dressed. Spraying product directly on to component wastes product and increases detail time. Application with ValuGard VG-SP Sponge, (for interior components), or VG-SG, Sponge (for tires), is ideal for economy and performance. Wipe away any excess using a terry towel.

Tips: For best results make sure that component to be treated is clean and dry. *Premium Dressing* can be applied in multiple coats for more shine.

Sizes: VG-E108 = 12/22 oz. bottles per case
VG-E108G = 4 gallons per case
VG-E109 = 5 gallon pail
VG-E109D = 55 gallon drum
